Engineering Geology, 35 (1993) 261–262
Elsevier Science Publishers B.V., Amsterdam

Contents Volume 35 (1993)

Research papers

Activity of the Yakatabari mudslide complex, Porgera, Papua New Guinea
R.J. Blong and R.C.M. Goldsmith 1

Microstructural controls on the geomechanical behaviour of ignimbrite
V.G. Moon 19

Geotechnical characteristics of ignimbrite: A soft pyroclastic rock type
V.G. Moon 33

Transient poroelastic response of equivalent porous media over a mining panel
M. Bai and D. Elsworth 49

Liquefaction and flowage at archaeological sites in the inner belt of central Japan: Tectonic and hazard implications
Y. Kanaori, S.-i. Kawakami, K. Yairi and T. Hattori 65

Anatomy of a porphyroblastic schist: Alkali-silica reactivity
M.L. Thomson and P.E. Grattan-Bellew 81

Engineering geological investigations and the application of rock mass classification approach in the construction of Norway's underground Olympic stadium
R. Bhasin, N. Barton and F. Løset 93

Calcium carbonate cementation of sand: A method for producing artificially cemented samples for geotechnical testing and a comparison with natural cementation processes
N. Molenaar and A.A.M. Venmans 103

Factors affecting distribution of instability of river banks in the Niger delta
T.K.S. Abam 123

Book Reviews

Stresses and Displacements for Shallow Foundations, by D. Milovic — M. Pacheco 135

Expansive Soils: Problems and Practice in Foundation and Pavement Engineering, by J.D. Nelson and D.J. Miller — K.V. Ramana 136

Soil Settlement Effects on Buildings, edited by E. Duláska — Y. Kanaori 138

Announcement 141

The Role of Engineering Geology for Planning and Construction of Underground Openings.
Introduction of the Symposium 19-3 "Engineering Geology in the Utilization of Underground Space", 29th Int. Geological Congress, Kyoto, Japan 1992
M. Langer 143

Underground construction on engineering geological terms: A fundamental necessity for the function of metropolitan environments and Man's survival
C.-O. Morfeldt 149

Geoengineering techniques used in the construction of underground openings in jointed rocks
K. Aoki and Y. Shiogama 167

Utilization of underground spaces in urban areas: Urban geo-grid plan
N. Miyake and A. Denda 175

Use of solution-mined caverns in salt for oil and gas storage and toxic waste disposal in Germany
M. Langer 183

Underground oil storage facilities in Japan
T. Makita, Y. Miyanaga, K. Iguchi and T. Hatano 191

Construction of underground caverns for petroleum storage in orogenic areas: Geological stability
K. Hoshino 199

The hydrogeology of granitic rocks in deep boreholes used for compressed air storage
T. Shidahara, T. Oyama and K. Nakagawa 207

Geotechnical site investigations to prove the rock stability of large cavities and the barrier efficiency of the rock mass
A. Pahl and L. Liedtke 215
